Welcome

Package Contents

- 1 x Eaton Thummer
- 1 x 5 Metre USB cable
- 1 x ThummerSetup CD
- 1 x Installation Guide
- 1 x Quick Reference “Chord Guide”

PC installation

Thummer Application Install

Put the Thummer set up CD in your computer.

Install the ThummerSetup software by opening “ThummerSetup”.

At the welcome screen click “Next”.

At the “Select Destination Location” screen click “Next”

At the next screen make sure “Full installation” is selected and click “Next”

You will be asked to select a start menu folder, to continue click “Next”

At the “Ready to Install” screen review your settings and then click “Install”

Please wait while the setup installs your software

After the setup program has completed you will be prompted to restart your computer. Make sure “Yes, restart the computer now” is selected and click “Finish”.

Installing the drivers

Connect your Thummer to a USB port on your computer using the included cable.

Your computer should detect a new hardware device and prompt you to install the required drivers.

At the “Found new hardware wizard” screen it will ask “can windows connect to windows update to search for software”

Select “no, not this time” and click “next”.

Select “Install from a list or specific location (advanced)” and click “next”

Make sure “Search for the best Driver in these locations” is selected and click “Browse”.

A window “Browse For Folder” will pop up and you will be asked to select the folder that contains drivers for your hardware.

Click on “My Computer” locating the “ThummerDrivers” folder on the root of your C drive and click “Ok”

Click “Next”

A window will pop up letting you know this driver has not passed Windows logo testing.

Click “Continue Anyway”.

Your driver will be installed. Click “Finish”

Mac Installation

Step 1:

Put the Thummer set up CD in your computer.

Drag ThummerSetup to your applications folder

Install the USB drivers by opening FTDIUSBSerial driver.pkg

Step 2:

Connect your Thummer to a USB port.
